

# Seward High School

## Data Analysis Parent Information Sheet

Hello I am your sons/daughters Data Analysis teacher this year. In an effort to share your students progress this year I would like to share some information about our class with you.

All of the Data Analysis daily assignments will be posted on my website. It is located at: <http://connectseward.org/edu/shs/da1/main.htm>  
This site also contains my grading practices and other class information.

I would also like to send out some notices occasionally of events in class and helpful links where you can assist your child in being successful in class. I am going to do this by email. If you have an email account please list it below and I will add you to a distribution list.

Please also check your child's progress/grades on the PowerSchool server. It is located at:  
<http://ps.sewardpublicschools.org/public/>

Your son or daughter will be instructed on how to use this tool if you have not used it before. They can show you how it works.

Please feel free to contact me at:  
[russ.wissing@sewardschools.org](mailto:russ.wissing@sewardschools.org) if you have any questions about the class.  
You can also call the school at 643-2988. My planning time is from 1:30-2:30 PM daily. I look forward to a successful year in Data Analysis and appreciate your support in helping you child to be successful in class.

.....Cut here and return lower portion.....

Please return this portion so I know you received this sheet and if you have an email I can add you to my distribution list
